

Second Edition of an Exclusive On-line Event with Pierre Fabre's Executive Management

14th – 16th March 2022

- Oncology, Dermatology and Rare Diseases
- Urology, Rheumatology, and Women's Health
- Virtual meetings with Inova's One-on-One Partnering™ platform
- Free registration

The Executive Management Team at Pierre Fabre is pleased to invite prospective partners to the second edition of our custom and exclusive on-line event.

We are reaching out to innovative biopharmaceutical companies developing new therapies in the areas of oncology, dermatology and rare diseases, and looking for a partner with a global presence.

Proposals for partnerships leveraging our commercial capabilities in Europe in the areas of urology, rheumatology, and gynaecology/women's health will also be welcome.

The mission of The Pierre Fabre Group for over fifty years has been to develop innovative products and solutions that make significant contributions to the health and well-being of men and women all over the world, making a positive impact on their daily life.

Our Group has been built on a combination of excellence in R&D and strong lasting collaborations with trusted partners. We are convinced that innovation and commercial success go hand in hand. This vision has been borne out by the grant in recent years of Marketing Authorisations for a range of new treatments in various indications including colorectal cancer, melanoma, breast cancer, actinic keratosis and infantile hemangioma.

Recent years have seen a step change in the use of digital tools to enable the biopharma community to effectively connect and collaborate across the world. Following the success of the inaugural Pierre Fabre Virtual Biopharma Partnering in February 2021, we have decided to renew this event giving you an opportunity to meet and interact with our Executive Management.

Our objectives for this event are

- To provide you with a showcase for your company and your projects for innovative therapeutics
- To enable you to learn more about our group and our vision for the future
- To give you an opportunity to connect with the key decision makers within Pierre Fabre
- To foster and nurture long term partnerships

From 14th to 16th March, we will be hosting an **on-line partnering event** composed of virtual face-to-face meetings with **Pierre Fabre** scheduled via the **One-on-One Partnering™** platform provided by **Inova**

Pierre Fabre will be represented by members of our Executive Management team and our Corporate Business Development & Licensing team.

Our partnering objectives: what Pierre Fabre is looking for?

Pierre Fabre - Virtual Biopharma Partnering 2022 is aimed at Executives, Business Development Professionals and Researchers from biotechnology and pharmaceutical companies.

We would be pleased to learn about opportunities for partnerships in the following areas:

Oncology: We are looking for innovative therapies for the treatment of tumours, ideally already at the clinical development stage. With a world-wide presence* we also welcome proposals for commercial stage licensing opportunities.

Dermatology: We are interested in Rx products, particularly in the areas of immuno-dermatology, onco-dermatology and paediatric dermatology. Our main focus is on assets in clinical development, and commercial stage opportunities that would fit well with our global footprint*.

Rare Diseases: We welcome proposals for licensing and/or collaboration opportunities for innovative treatments in clinical development for orphan indications for which there is a strong unmet medical need.

Urology, Rheumatology, and Gynaecology: With a comprehensive commercial footprint in Europe we are actively seeking partnerships for marketed or near to market products in these therapeutic areas.
