Pierre Fabre South Africa: Efficient, safe and quality products from Health to Beauty.

The Pierre Fabre Group has been present in South Africa since 1994 with very targeted oncology and haematology drugs. It is one of the very few pharmaceutical companies that produces drugs, healthcare products and dermo-cosmetics following the same efficacy and safety requirements and the same stringent development and manufacturing processes.
Pierre Fabre Laboratories was created in the early 60s by Mr Pierre Fabre, a French pharmacist.

Today Pierre Fabre Laboratories is the second largest independent pharmaceutical group in France with international sales accounting for 54% of turnover.

The activities cover all aspects of healthcare, from prescription drugs and family health products to dermo-cosmetics. Every year, the group allocates 20% of its drug revenues to R&D, focusing on three main areas: oncology, dermatology and neuropsychiatry.

The Pierre Fabre Group has been present in South Africa since 1994 with targeted oncology and haematology drugs.

Pierre Fabre South Africa focuses on 3 complementary activities:

- **Prescription Drugs**
  - Focuses on 4 areas of expertise: Oncology, Dermatology, Women’s Health and Neuropsychiatry

- **Consumer Health Care**
  - Family health (Pedi-Relax), Oral care (Elgydium, Eludril) and natural health (Naturative)

- **Dermo-Cosmetics**
  - Pioneers and leaders in the dermo-cosmetics (pharmacy skin care through advice) concept

**Foundation Pierre Fabre**

In 2008, Mr. Pierre Fabre donated the majority of his stake in the company to the Pierre Fabre Foundation, a government recognised organization of public interest.

The Pierre Fabre Foundation missions include:
- Improving access to drugs and quality healthcare in developing countries (Africa and South East Asia)
- Educating and training pharmacists
- Combating sickle-cell disease, a genetic disorder

The Avène Hydrotherapy Center is completely dedicated to dermatology for the treatment of skin conditions such as atopic dermatitis, eczema, psoriasis, scars and burns scars, post-cancer, ichthyosis, etc. Today it offers the most modern medical equipment combined with the world-renowned quality and efficiency of its thermal water. Treatment for skin conditions at the Avène Hydrotherapy Center is approved for reimbursement by the French national social security.

Avène Hydrotherapy Center

Avène Hydrotherapy Center dedicated to dermatology since 1743

UNIQUE SAFETY for even the most sensitive skin.
The world’s FIRST 100% sterile formula, without preservatives or fragrances, and offering complete tolerance and safety for allergy-prone skin types.
The highly-technical, patented D.E.F.I. (Device for Exclusive Formula Integrity) delivery system allows the formula to be completely sterile and safe for the entire use of the product with no risk of retro-contamination.

A source of calm for sensitive skin, naturally active

In August 2014, three South African children travelled to the town of Avène in the south of France for the treatment of severe Eczema at the Avène Hydrotherapy Center.

The cutting edge technology & innovation of sterile cosmetics

No.1 in France and Europe

Skin care line based on the Avène Thermal Spring Water

Developed for the most sensitive or intolerant skin.
Validated by stringent tests of effectiveness, tolerance and hypoallergenicity.
Tested under dermatological control.
Gentle formulas and textures developed to comfort sensitive skin.

At the end of the Hydrotherapy Treatment:
Avène Thermal Spring Water application reduced inflammation and itching. The composition of the water, with an optimal calcium/magnesium ratio, guarantees efficacy and tolerance: skin balance is restored.

Safe and effective prevention and correction treatments.

Pierre Fabre Oral Care: 45 years of expertise in Europe, leader in France

A preferred partner of pharmacists, dentists and oral hygienists, Pierre Fabre Oral Care and Elgydium offer support in their day-to-day practice.

Elgydium offers an efficient and safe toothpaste range to prevent and treat the problems they routinely encounter, its efficacy is clinically proven.

Elgydium complete daily toothpaste range for the whole family:

Elgydium Antiplaque: Daily cleansing toothpaste containing Chlorhexidine, a strong antiseptic agent. Fights against tartar and plaque build-up responsible for gingivitis and periodontis.

Elgydium Sensitive: Formulated to relieve discomfort caused by dental hypersensitivity. Patented active ingredient, Fluorinol, remineralises enamel 5 times faster than other fluorides. Extra gentle to protect sensitive gums and teeth.

Elgydium Whitening: For extra gentle, extremely low abrasive and in-depth cleansing. Patented micro-pulverised sodium bicarbonate reaches and dissolves stains.

Elgydium Kids (2-6 years old) and Elgydium Junior (7-12 years old) offers safe and effective dental protection for your children. Contains Fluorinol at the optimal dosage suitable for children and young teenagers. Sugar-free.

Medicalised foot care treatment creams recommended by podiatrists

Pedi Relax

As the foot care expert, Pedi Relax offers a range of medicalised products for all your foot care needs. The range has been exclusively designed to treat, refresh and protect your feet.

Pedi Relax offers 2 ranges indicated for specific types of treatment: blue for Protection and orange for Moisturising.

Protection

Pedi Relax Diabetic foot care cream is a dual-action treatment cream that is both protective and regenerative. Formulated specifically for diabetics but also for those with exceptionally dry and damaged feet. The advanced formula has intensive hydrating properties due to urea, vaseline, glycerine and ruscus plant extracts well known to improve blood circulation.

Pedi Relax Anti-rubbing foot care cream is specifically designed to protect your feet from blisters and inflammation caused by chaffing from shoes due to sports activities, new shoes or for people on their feet all day. Film-forming agents create a second skin effect that envelopes and protects your feet.

Moisturising

Pedi Relax Regenerative is for patients with dry, damaged feet prone to developing cracked heels and potential infection. It boosts the skin’s regeneration process, nourishes and moisturises the skin while offering a sensation of well-being and relaxation.

Pedi Relax Moisturising cream is a rich yet non-greasy moisturiser for dry and very dry feet, calluses and cracks. It is rapidly absorbed to provide a soothing effect. The delicate fruity fragrance is thanks to sweet orange essential oil.

Pansoral

Specifically designed to soothe your baby’s teething discomfort safely and effectively

Pansoral Teething Gel is a natural product that has been specifically formulated to ease and alleviate the pain associated with teething in babies.

Contains plant extracts which are well known for their soothing and softening properties: chamomile, marshmallow and saffron.

Pansoral Teething Gel contains NO SUGAR, NO ALCOHOL and NO ANALGESIC (analgesic substances are dangerous as they alleviate the pain but may hide an infection).

Pansoral can be used as often as required.

In addition to pain, the below signs and symptoms may be indicative of teething:

- Swollen, tender red gums
- Red flushed cheeks or face
- Cheek rubbing and redness on the same side as the erupting tooth
- Increased drooling
- Rash around the mouth
- Sleepless nights and irritability

Caring for the human being as a whole

In order to do this, we design and develop innovative solutions that contribute to people’s well-being, from health to beauty. We achieve this by cooperating with health care professions, our trusted partners worldwide, by drawing relentless inspiration from nature and plants, and by placing pharmaceutical ethics at the very heart of our operations.
